HyperX SoloCast - USB Microphone (Black) (4P5P8AA)

Active as of 1/8/2021

Overview

Easy-to-use USB microphone for streamers and content creators.

For video editors, streamers, and gamers looking for a USB microphone with great sound quality, the HyperX SoloCast is a must have. Get 24-bit, 96kHz recordings with the SoloCast's high bit depth and sampling rate. It's Plug N Play with a USB-C connection, making it simple to use, with some of our fan-favorite conveniences like the tap-to-mute sensor and LED mute indicator. The versatile microphone has a flexible, adjustable stand and is also compatible with most boom arms, so it can either sit on your desk or work mounted. Certified by TeamSpeak and Discord and compatible with OBS, XSplit, Streamlabs OBS and a number of other programs, it's an extremely streamer-friendly microphone.

Plug N Play audio recording with USB-C connection

Get quality audio recordings with this easy-to-use USB condenser microphone. The cardioid polar pattern is most sensitive to sound sources in front of the microphone and reduces background noise.

Hi-Res 24-bit/96kHz recording

SoloCast supports a high, studio-level bit depth and sampling rate.

Tap-to-Mute sensor with LED status indicator

Simply tap the top of the mic to mute, and the easy-to-see LED indicator lets you spot whether or not you're broadcasting.

Flexible, adjustable stand

The easy-to-position stand swivels to support a variety of setups. You can even fit it under a monitor if your setup is tight on space.

Boom arm and mic stand threading

Versatile built-in mount adapter fits 3/8-inch and 5/8-inch threads, making it compatible with most mic stands or boom arms.¹

Customizable via HyperX NGENUITY Software

Adjust volume level and upgrade firmware to take advantage of 24-bit, 96kHz recording. More great features are on the way.

Multi-device and program compatibility

Get great sound whether you're connecting to a PC, PS4™, PS5™, or Mac®. SoloCast is certified by Discord and TeamSpeak™, and works on major streaming platforms like Streamlabs OBS, OBS Studio, and XSplit.
