

Highlights

- No compromise storage for any application demanding the best in HDD storage.
- A wide range of capacities up to 26TB¹ to meet your enterprise-class storage needs.
- Among the highest workload and reliability ratings of any Western Digital[®] hard drive.
- Peace of mind with a 5-year limited warranty.³

Ideal for:

- Hybrid cloud and colocation storage for small and medium businesses.
- Data repatriation efforts requiring rapidly-scalable local or distributed storage.
- Demanding applications running high uptime workloads and more complex storage arrays such as RAID and JBODs.
- Adding an additional storage layer to strengthen business continuity implementations.
- Storing A.I. training data sets and hyperparameter tuning data.

WD Gold[®] Enterprise Class SATA HDD

Your Data Is Gold

WD Gold[®] HDDs incorporate our latest innovations to handle heavy, continuous read-write workloads in the toughest of enterprise and commercial system environments. WD Gold[®] drives provide the utmost in HDD storage performance, reliability, durability, and capacity-point flexibility to small and medium businesses and design professionals whose mission-critical data and creative output are essential to their success.

Built For Demanding Use Cases

Customize your business's storage mix to fit your specific needs with hard drives in capacities of up to 26TB¹ engineered for demanding applications and read-write workloads of up to 550TB² per year.

Enhanced Reliability

With a five-year limited warranty³ supporting up to 2.5M hours MTBF,⁴ WD Gold[®] hard drives deliver enhanced levels of dependability and durability.

Protection and Performance Boost

ArmorCache[™] technology (available in 22TB and above) is a Western Digital-only feature that provides enterprise power loss protection of your data in write-cache enabled (WCE) mode while increasing performance in write-cache disabled (WCD) mode.

Continuous Innovation

The WD Gold[®] 26TB¹ model is built on the world's first 11-disk HDD platform and delivers the 10th generation of HelioSeal[®] technology, which has proven to be a vital foundation for continuous capacity growth for over a decade.

Robustness For Tough Environments

Our exclusive Rotational Vibration Safeguard (RVS) uses dual sensors to anticipate and counteract disturbances, maintaining peak performance in high-vibration environments.

Flexibility and Peace of Mind

WD Gold[®] has undergone extensive testing and validation in a variety of host bus adapters, servers, and enterprise storage solutions employing RAID and other data resiliency configurations.

WD Gold® Enterprise Class SATA HDD

Specifications

¹ 1MB = 1 million bytes, 1GB = 1 billion bytes, and 1TB = 1 trillion bytes. Actual user capacity may be less depending on operating environment.

² Workload Rate is defined as the amount of user data transferred to or from the hard drive. Workload Rate is annualized (TB transferred X (8760 / recorded power-on hours)). Workload Rate will vary depending on your hardware and software components and configurations.

³ See support.wdc.com for region-specific warranty details.

⁴ Projected values for model numbers WD261KRYZ, WD242KRYZ, WD203KRYZ, WD122KRYZ, WD103KRYZ. Final MTBF and AFR specifications are based on a sample population and are estimated by statistical measurements and acceleration algorithms under typical operating conditions, workloads of 220TB/year, and 40°C device-reported temperature. Derating of MTBF and AFR will occur above these parameters, up to 550TB/ year and 60°C (device reported temperature). MTBF and AFR ratings do not predict an individual drive's reliability and do not constitute a warranty.

⁵ 512e: Advanced Format drive with 512-byte logical sectors and 4K (4096-byte) physical sectors; 512n: Native 512-byte logical and physical sectors.

⁶ This drive is in compliance with the European Union Directive 2011/65/EU and Directive (EU) 2015/863 on the restriction of the use of certain hazardous substances (RoHS) in electrical and electronic equipment.

⁷ 1 MB/s = 1 million bytes per second. Based on internal testing; performance may vary depending upon host device, usage conditions, drive capacity, logical block address (LBA), and other factors.

⁸ Portion of buffer capacity used for drive firmware.

⁹ Random RW 50/50 8KB QD=1 @40 IOPS.

¹⁰ Based on use of Idle_A.

¹¹ 5°C ambient temperature, 60°C device reported temperature.
