# ALIENWARE 27 4K QD-OLED GAMING MONITOR – AW2725Q

**Highest pixel density in a QD-OLED monitor** World's highest number of pixels per inch on a QD-OLED monitor at 166 PPI, thanks to an advanced QD-OLED inkjet manufacturing process, ensuring the highest level of 4K detail.

# **Outstanding color performance**

Superb color performance so you can see games, media, and content as intended, thanks to DCI-P3 99% color coverage and Delta E<2 accuracy.

Dolby Vision support, VESA DisplayHDR True Black 400, and infinite contrast ratio provide incredible HDR performance for stunning brights and deep, inky blacks, with no loss of detail.

Creator mode lets you switch between the DCI-P3 and sRBG color spaces for more color-sensitive work, while a hardware-based low blue light solution lowers LBL without sacrificing color.

Peak pixel clarity meets outstanding QD-OLED performance in the Alienware 27 4K QD-OLED Gaming Monitor - AW2725Q.

Featuring the world's most pixels per inch in a QD-OLED monitor at 166 PPI\*, AW2725Q is perfect for gamers with a sharp eye for detail.

# Responsive, fluid motion

A 240Hz refresh rate and near-instantaneous 0.03ms response time ensure smooth motion and virtually zero ghosting or blurring, even in the fastest-paced games.

NVIDIA G-SYNC Compatible, FreeSync Premium Pro, and VESA AdaptiveSync certification eliminates screen tear for seamless gameplay.

#### All-new sleek, efficient monitor design

Evocative new AW30 design in Interstellar Indigo colorway comes with revamped 360-degree ventilation to keep internals cool during extended use, while a small-footprint base leaves more desk space. Simplified cable management promotes a clean desk setup.

# Versatile connectivity with HDMI 2.1 FRL

HDMI 2.1 FRL offers up to 4K at 240Hz via HDMI, supporting features like Variable Refresh Rate (VRR), auto low latency mode (ALLM), and eARC for Dolby Atmos speakers and other high-definition audio setups.

Alienware Command Center 6.6 enables userdefined visuals and system settings customization

A revamped OSD menu makes navigating monitor settings simple and easy.

# Anti-burn in technologies and warranty

A graphite sheet placed between the panel layers helps disperse heat, which fights against burn-in and image retention. Al-based technology actively monitors on-screen images and makes adjustments to help prevent burn-in.

Three-year Advanced Exchange Service warranty includes OLED burn-in coverage.
