Description

In a modern office as well as in a home study, equipment that combines functionality and compact size works best. Everyone likes to have a bit more free space on the desk while working. Therefore, a Slim keyboard is a good solution.

FOR HOME AND OFFICE

In a modern office as well as in a home study, equipment that combines functionality and compact size works best.

Everyone likes to have a bit more free space on the desk while working. Therefore, a Slim keyboard is a good solution.

SLIGHT, STRONG AND FUNCTIONAL

The Natec Trout keyboard is a smart combination of strength and functionality enclosed in a slim body.

The solutions such as covering the keys with a protective layer (PU coating) makes them even more resistant to abrasion, while the keyboard construction itself is resistant to spills in the case of unforeseen accidents in the office or at home.

The convenience of use is ensured by a slim and flat keyboard profile, feet adjusting the height of the device and 12 multimedia keys to facilitate the use of a number of functions while using the computer.
