

B-42 RGB – the propitious RGB gaming case

The B-42 RGB convinces, in addition to its piano lacquer front, by the integrated RGB LED strip in the front, which can be controlled by the reset button in its colors and effects. The window side panel made of acrylic provides insights into the inner workings of the case and skilfully stages the built-in hardware.

The front connectors are located in the upper part of the front and ensure comfortable use of the standard connections. Space for up to three fans, thumbscrews to open the side panels and installation options for 2.5" HDD/SSDs complete the package.

- ✓ Piano lacquer front with integrated RGB LED strip
- ✓ Window side panel made of acrylic
- ✓ Graphics cards up to 35cm in length
- ✓ good airflow
