Component-Focused Cooling Design
Both the CPU and GPU are designed with individual dedicated airflow paths, effectively preventing any overlap of heat generated by each component.

Unparalleled Cooling Efficiency

In Mini-ITX/Mini-DTX configuration, the SUGO 17 can accommodate a maximum of 11 system fans. Specifically, 3 x 120mm and 4 x 80mm fans are assigned for the GPU, as well as 4 x 120mm fans for the CPU. Additionally, its versatility supports the installation of dual 360mm radiators - with one dedicated to each component -further enhancing the cooling potential and ensuring optimal thermal performance.
