

## LightPro Advanced LCD

**Advanced. LCD. Projection.** For the first time in over a decade, InFocus welcomes its newest LCD projector. Of course, a lot has changed since InFocus released the first LCD over 25 years ago, but the dedication to the highest quality products and providing cutting-edge technologies has not. Placed alongside our other Lamp, LED, and Laser models, this new affordable and bright LCD series comes packed with: up to 5000 lumens, a 50000:1 contrast ratio, signal inputs up to 3840 x 2160 (4K) @ 30Hz, and weighs only 3.3kg – making it incredibly easy to move around your home, office, or anywhere!

### **Benefits**

#### **Display over USB**

The latest display technology! Display content from your Windows laptop or computer via the USB-C or USB-A port with a USB cable to the projector.

#### **Six Point Pincushion & Barrel Adjustment**

Projecting on to an uneven or rounded surface? We have you covered with our optical distortion algorithms and built-in image correction software.

#### **Display over LAN**

Connect your projector and Windows device to the same local area network and display source content over the network to the projector and onto the big screen. When no network is available, we also offer the ability to display via USB to the projector's RJ45 port by cable.

#### **Command & Control**

Whichever protocol or hardware control device you are using we offer compatibility with all major formats and devices.

#### **Screen Splicing**

Need to see the detail in one part of an image or zoom in to display a different perspective? Our Screen Splicing allows you to cut the image into a 5x5 or less area and then take one section, or multiple sections, one at a time, and display it full screen.

#### **Memory Viewer**

View files, images, and video with audio directly from a USB thumb drive using the projector USB-A port.

#### **Horizontal & Vertical Keystone**

Correct the displayed image quickly and effortlessly with both horizontal and vertical keystone correction.

#### **Logo Capture & Display**

Display your company logo or school mascot on your projector start-up screen background with our built-in image capture tool.

#### **Optimal Contrast Ratio**

The implementation of advanced Iris dynamically adjusts the iris settings providing brightness optimization to best suit the content being displayed. Advanced iris gives dark scenes and content darker blacks and opens up on bright scenes to make optimum use of the projector's available light output. The resulting contrast levels are outstanding!
