VK2

Thanks to its spacious design and refined looks, the VK2 is an ATX case that is suitable for a wide range of setups, from gaming PCs to office computers. Two fans are already pre-installed for a workable airflow. This can be expanded to comprise up to eight fans or, for maximum performance, radiators with a size of up to 360 mm. There is also sufficient space for HDDs and SSDs as well as tidy cable management.

Features

- **SUBTLE, CLOSED DESIGN**
  With the subtly playful look of the front panel and visually closed side panels, the VK2 is refined in design and blends in perfectly anywhere, whether it's the gaming room or the office.

- **EXPANDABLE AIRFLOW**
  Two 120 mm fans are already pre-installed in the VK2, but this can be easily expanded to up to eight fans. The areas of air intake are protected by dust filters.

- **WATER-COOLING SUPPORT**
  For demanding systems, and instead of fans, the VK2 can be equipped with a 240 mm or 280 mm radiator under the top panel and a 360 mm radiator behind the front panel.

- **SUFFICIENT SPACE FOR DATA STORAGE**
  Up to two 3.5" HDDs or four 2.5" SSDs can be conveniently installed in different locations inside the VK2.

- **CONNECTIONS NEAR THE FRONT**
  For peripheral devices, two fast USB 3.0 ports and a TRRS port for headsets are available on the top of the ATX case.

- **TIDY INSIDE**
  To keep the inside of the VK2 orderly and tidy, the case is provided with a power supply tunnel as well as sufficient space for cable management.
