

**Product name: ENDORFY Viro Plus USB Alt Gray**

**Product code: EY1A013**

ENDORFY Viro Plus USB Alt Gray combines studio-quality sound with the comfort characteristic of premium headphones. The exceptional audio experience is ensured by 53 mm drivers, a detachable noise-canceling microphone, a 7.1 USB sound card, and interchangeable earpads. All of this is enclosed in a stylish, minimalist casing in unique shades of gray.

### **Crystal-clear sound**

The headphones are equipped with 53 mm drivers that deliver a detailed, balanced sound. With them, you'll easily catch even the subtlest details in music, movies, podcasts, and games. Combined with a closed-back design and memory foam earpads, the headphones provide good passive isolation, allowing you to fully immerse yourself in the sound.

### **A microphone that adapts to you**

The Viro Plus USB Alt Gray is equipped with a detachable microphone with a pop filter. Its design not only ensures comfort during use but also effectively eliminates background noise, resulting in clear and crisp speech – whether in games or during online meetings. The microphone can be easily detached, which is especially practical when listening to music on the go.

### **Comfort paired with functionality**

The soft padding and ergonomic design of the headphones ensure that even long hours of use are comfortable. The set includes an additional pair of ear pads made from breathable material – perfect for warmer days or extended use.

### **7.1 Surround Sound with personalization**

The set includes an external 7.1 USB sound card, which, with the help of dedicated software, allows precise adjustment of sound parameters. You can save your own sound profiles, perfectly tailored to various uses – from gaming, through music listening, to watching movies. The resulting sound quality surpasses most integrated sound cards found in laptops and motherboards.
