Manufacturer	iBOX
Manufacturer item no.	IKGMK3

Description

Get to the highest level of gameplay thanks to the full-size iBOX Aurora K-3 gaming keyboard. It uses quiet, brown switches with a long lifetime of up to 50 million presses. The upper keyboard housing is made of aluminum. The illuminated keys are grouped into blocks marked with colors, which makes it easier to use the keyboard. The backlight can be turned off, adjust the brightness and can be adapted to your own needs. There are 20 different backlight effects available. You can turn on the backlight of selected keys used for games, which will significantly simplify the game. The keyboard has a magnetically attached wrist rest which reduces hand fatigue during long-lasting play. A unique feature of the Aurora K-3 is the built-in backlight mode or volume change knob. The Fn key allows you to use the function buttons for multimedia tasks (player control, launch of a web browser, etc.). Keyboard software is available in Polish and English. It allows you to record macro commands, assign properties to buttons, and select a backlight mode. The keyboard has 2 anti-ghost modes: for 6 keys and full. It's the perfect product for every player. The ability to block the Win + L combination will prevent accidental blocking of the computer at the least appropriate time during the game.

Main features

General	
Keyboard form factor	Standard
Keyboard style	Straight
Device interface	USB
Keyboard key switch	Mechanical
Keyboard layout	QWERTY
Keyboard number of keys	108
