

SHARK LIGHTS RGB PWM

For PC cases that deserve more than just a highlight: The SHARK Lights RGB PWM fans have three encircling layers of illumination to create lively and vivid effects with addressable RGB. In addition, the fan speed can be adjusted through the mainboard thanks to PWM functionality.

Features

■ SIMPLE SPEED CONTROL

Thanks to the PWM function, the SHARK Lights RGB PWM fans can be easily controlled via the mainboard for optimal cooling and quietness.

■ STRIKING COLORS AND EFFECTS

For a striking play of colors and effects, the SHARK Lights RGB PWM fans are encircled by three layers of illumination emitted by the addressable RGB LEDs.

■ NEAT LOOK

For a neat and tidy look, the SHARK Lights RGB PWM fans have a modular frame design, allowing the installation screws to discreetly disappear behind the fan coverings.

■ EASY INTEGRATION

The SHARK Lights RGB PWM fans are compatible with common lighting and synchronization options which use a 5V-D-coded-G connection and can therefore be easily integrated into existing hardware systems.

■ MAXIMUM EFFICIENCY

The aerodynamic fan blades of the SHARK Lights RGB PWM and the fluid dynamic bearing provide an air flow rate of 89 cubic meters per hour at 1,700 rpm and 24.8 dB(A).

■ MINIMIZED CASING VIBRATION

Rubberized contact points on the rear of the fan frame ensure that vibration transmitted onto the PC casing is minimized and support an optimally smooth operation of the fan.
